

- Wireframe 1
  - As a user, I want to set up an account with password security.
  - As a user, I want to be able to sign into that same account and with access to all of my prior posts, activity, etc.
- Wireframe 2
  - Option 1:
    - As a logged-in user, I want to create a new trip.
    - As a logged-in user, I want to add an itinerary component to the trip I have created, and have the option to include a hyperlink and photo url.
    - As a logged-in user, I want to be able to see the itinerary component I have uploaded, and continue to add new itinerary components.
  - Option 2:
    - As a logged-in user, I want to create a new trip.
    - As a logged-in user, I want to select what kind of trip component I am added (hotel, activity, restaurant).
    - As a logged-in user, I want to add an itinerary component to the trip I have created, and have the option to include a hyperlink and photo url.
    - As a logged-in user, I want to be able to see the itinerary component I have uploaded, and continue to add new itinerary components.
- Wireframe 3
  - As a logged-in user, I want to upvote or downvote a trip idea.
  - As a logged-in user, I want to see who submitted the idea.
  - As a logged-in user, I want to see who voted on the idea.
  - As a logged-in user, I want to see any trips that are no longer an option (due to downvotes) become opaque.
